

Omar Fofana

Albany, NY | omarfofana620@gmail.com | 845.772.4095 | <https://github.com/omarf72>

Education

Quinnipiac University, Hamden, CT

Bachelor of Arts; Major: Computer Science, Minor Economics May 2026

Technical Projects

Booking Event API-

- Developed a backend API using Node.js, Express, MongoDB, and Mongoose with MVC architecture and RESTful design principles.
- Implemented JWT authentication, bcrypt password hashing, role-based authorization, and account recovery functionality.
- Built event search, filtering, pagination, reservation capacity enforcement, and dynamic spot availability calculations.
- Created automated integration tests using Jest and Supertest covering authentication, authorization, events, and reservations.
- <https://github.com/omarf72/Event-Booking-API>

Boomer's Adventure-

- Enhanced legacy Java code in a 2D RPG game within a Scrum team over five sprints.
- Debugged gameplay logic and integrated new mechanics using Object-Oriented Programming principles.
- Utilized Git, GitHub, and Visual Studio Code for version control and collaborative development.
- https://github.com/AnzilottiChristopher/SER225_Plasma

FeedBackLogger-

- Developed the frontend of a feedback portal for students using React, HTML, CSS, and JavaScript.
- Collaborated on a team using Git and GitHub for project management.
- <https://github.com/PaulZ357/SER340Project>
